FRIDAY, JUNE 9

THE PUBLIC GET THE BENEFIT

Senator McGeen says the Dominion Government
subsidizes the newspapers to the tune of
\$600,000 a year, by carrying the papers in the
mails at a loss.

Some of the papers must have been saying
something about the Senator or the Government
that subsidized his mental health, but he never
let a man talk such nonsense in cold blood.

If the Government loses money carrying papers
at less than cost the benefit is to the public, says
the newspaper publisher. Few of these, if any,
make any money at all on mail subscriptions. Most
of them actually lose money on that branch of their
business.

If the postal rates were raised sharply it would
be the public who would suffer, not the owners
of the papers. Subscribers would have to pay
to go up. That would mean fewer country readers
could afford to have daily or weekly papers coming
into their homes.

Any of the Senator's newspaper friends would
verify these facts for him. One of them, Mr. Nichols
of the Winnipeg Tribune, did so in a rather forceful
way at the meeting of the Canadian Press at
Quebec. If that doesn't satisfy the Senator he might
accept a Royal Commission to look into the matter.
The papers would rather welcome that.

CROP AND PRICE OUTLOOK

Premier Brownlee told the members of the
Canadian Manufacturers' Association at Toronto
that the outlook in the west is for a record crop
with wheat prices high enough to free the growers
from the feeling of "insecurity" that has haunted
them for years.

The present prospect undoubtedly is for a big
crop, but the crop is not yet in the granaries. Seed-
ing was late, and the weather will depend upon the
on the lateness of the fall. Better prospects
have been killed in a night by an early frost.
Poorer prospects at this season are regarded as
bumper yields. The harvest is a matter of guess-
work, and will be for weeks to come.

As to prices, Mr. Nichols, manager and director of
the Southern farm in Winnipeg, told a Quebec
interviewer that western hopes are shaken on "the
aggressive policies of Franklin D. Roosevelt in the
United States and favorable results of the world
economic conference." That is the obvious fact.
However unavailing it may be to adduce the
fact and however humbling to our national
pride, wheat growers and Canadians generally are
looking to Washington and London, not to Ottawa,
for measures which will bring about an economic
level, break the depression and free the people
of the Dominion from "insecurity" strongly tinged
with despair.

EVERY LITTLE HELPS

The "pledge cards" collected by canvassers for
the Employment Service are already in the hands
of each. That is the sum, on the average, which the
signers have agreed to spend in work-making
improvements of one kind and another.

Since some are spending thousands, and many
are spending hundreds, there must be a host who
are spending less than \$50 each to bring the average
down to that figure. No one therefore need feel
that his contribution is unimportant if he can
spend only \$10 or \$25. There are plenty of contribu-
tions of similar amount, and when added to-
gether they make a huge sum.

Something in the neighborhood of \$60,000 of
new work-making expenditures is already in the
hands of the signers, and the amount will easily pass
the \$100,000 mark. This does not include a large amount of work
already undertaken before the canvassers called.
Does include some work that had been planned
before they called. It is probably fair to guess that
about three-quarters of this sum represents the
expenditure promised because the plan movement
was launched.

Every little helps, and as the season is yet young
it is quite possible that the sum will be well in
the hands of the signers in unemployment may result
in the spending of \$200,000 or more before the
summer is ended. That many years that most people
have lost the count, Edmonton's wonder team has
played a brand of basketball that was peculiarly

Forty Years Ago

From the Files of the Edmonton Bulletin

Efforts are being made to establish a school at
Egg Lake, south of Victoria.

The date of North Dakota is financially embar-
rased with a huge debt, and the province at the Olympic
games in London next year. That honor goes to the
victors. That the continent will be worthily repre-
sented there goes without saying. The team that
best the Grade should have little fear in London
or elsewhere.

As to the Grade, they are for the moment
"down," but they are a long way from being
"out." At the worst they are the second best
basketball team in the world. And Edmonton is
by no means prepared to admit, because of one
defeat, that they are not the best, or that they will
not prove it when another season comes around.

There was chosen
The Salvation Army have leased the old Metho-
dist church from A. D. Osborne. Two officers will

SIDE GLANCES - By George Clark

By J. S. Cooper

Back at my little summer home on the hillside
where I look down on the deck of the ship as
they pass by, inward bound with fuel oil for the
retineries or outward bound with lumber for China
and Great Britain, I have a constant view of the
army of Communists, ten thousand strong. The
victory was mine, but at the price of much havoc
and regret.

The ships have not been so plentiful of late.
China has not been able to buy much lumber or
steel because her money is based on silver, while
ours has been based on gold. Labor in China has
taken no more nor less effort: labor in Canada
has taken no more nor less effort. The wisdom
of the world has been rather better than ever. Men
have learned at last how to split the atom, but they
haven't learned how to swap goods on a basis of
energy units. Some nations have a gold yardstick
and others a silver yardstick. Worse still the yard-
sticks are under manipulation all the time so that
the nations are not sure of their own yardsticks in
relation to each other. Although men live by trade,
the wisdom of the world hasn't yet tackled the
problem of putting on a stable basis the thing by
which trade is carried on. For three years, though
China has needed wheat and lumber, and we had
wheat and lumber, we haven't been able to solve the
problem of exchanging our mutual needs.

Recently, a man was elected as president of a
nation that had no gold and could not trade with
anyone or even pay its own debtors. He issued
three billions of gold-money to help get
things going, and he applied the money to a
lot of war debts in silver. This lowering of gold
and increasing of silver value, has helped to bring
China and Canada to a point where they can trade
with each other again.

Two years ago a big mill at a place with the
significant name of Dollys closed down. It had
been shipping its product entirely to China. A week
from today it is to reopen. The deflated or sound
money that people are told to apply to this big mill
is the inflated or low dollar is reopening it.

I was looking at a steam tug by a huge tow-
boat about 44 sections of big logs, making a tow
about 100 miles long. The logs were low water
to see these craft at work again, and the lumber
camps and mills active, when I realized that
the people and the world are in a state of
panic. When I built the north wing, I was in too much
of a hurry to read the foundation. A fit log about
forty feet long and four feet thick lay in the way.
I started to move the house across the log and
down to and around it. Visitors used to be amused
at the novelty of a great log running under the
house.

During recent years an ant colony must have
taken up its abode in the log. Sunny days had
come—perhaps the smell of food or the impulse of
curiosity had led the ants to the log. On they
came undisturbed, so I had to take care trying
to sweep them back, and with axe and mallet
attacked the log.

At once the alarm was sent out and the army
retreated—only to find its nest destroyed. With
flame from burning newspapers, boiling water from
the kitchen, and the use of a high-pressure
formaldehyde and anything else from the chemical
cabinet, their catacombs were laid desolate. To
the king of the ants must have been the same
as the king of the ants of the San Francisco earthquake in one.

Henry Fabre could have produced a fascinating
volume from that ant nest and its destruction. The
log was tunnelled in a million directions. A par-
ticular tunnel was made as an ant nest, and
to digest wood, supplying its host with nitrogen,
which is missing from the wood cellulose. Most
astounding of all is the fact that the ants are
distinct in those creatures. Though confronted with
terrors of nature in the attack on their home, and
their lives, they are not disturbed, nor every ant
aware of it in its search for food. Treasures of
egg, much as a father in the hour of disaster seeks
to save his beloved child.

Man, however, is turned from his toes to ter-
mites—the so-called white ants—in his search for
the secret of happiness. The picture he gives of
life is a picture of a man who is not happy unless
—unless happiness lies in a matter of order and
filled duty—but it does reveal much of his in-
terior.

Anteloping man by ants, the termites have
achieved a society in some respects no improve-
ment on our own. They have a queen who does
all the maternity work for the colony, and she has
a husband. The husband is only a husband, but
the Queen grows to immense size, as if our Queen
was 70 feet tall and mother to all the nation. The
dregs of the royal pair are torn off. They are
imprisoned for life in the conjugal chamber. At
the rate of one a second, day and night, the Queen
lays eggs. She lays them at the rate of thirty
million a year. That doesn't seem an improve-
ment on our way of doing things.

They have warrior ants among the termites,
who mandibles, so apt for fighting, are too big
for eating food. They would eat unless the work-
ers fed them. The worker ants are all blind and
defenseless, yet the workers, without weapons or
armor, have the controlling power. Any time
the workers become too numerous, the workers
starve the surplus warriors to death by refusing them
food.

The termite state is not a democracy as we
understand democracy, nor is it monarchy. The
king and queen do not govern; they merely breed.
There is no congress or constitution. If the queen
dies, her job, the termites, choose a new one and
set the old one free. The spectacle of communism
among the ants with the workers under perpetual
control, the queen chosen by the workers, the
labor in the darkness of their burrows, is not an
entire one.

It would be the ants in one log colony having
nothing to do with anything, for something
produced by the ants to exchange for another log,
for mutual benefit, would starve because one ant-beap
was on a gold basis and the other on a silver basis.

THE OTTAWA ATMOSPHERE

According to an Ottawa message Premier
Browne, Alberta, wants to assure Mr. Bennett
that the Prairie Provinces endorsed the principle
of "certification of wheat production by legislation."

It is a principle which would mean that the
government would not issue a license to plant
wheat until the farmer had been certified by the
government that the land was suitable for wheat.

It is a principle which would mean that the
government would not issue a license to plant
wheat until the farmer had been certified by the

The Passing Show

By J. S. Cooper

Back at my little summer home on the hillside
where I look down on the deck of the ship as
they pass by, inward bound with fuel oil for the
retineries or outward bound with lumber for China
and Great Britain, I have a constant view of the
army of Communists, ten thousand strong. The
victory was mine, but at the price of much havoc
and regret.

The ships have not been so plentiful of late.
China has not been able to buy much lumber or
steel because her money is based on silver, while
ours has been based on gold. Labor in China has
taken no more nor less effort: labor in Canada
has taken no more nor less effort. The wisdom
of the world has been rather better than ever. Men
have learned at last how to split the atom, but they
haven't learned how to swap goods on a basis of
energy units. Some nations have a gold yardstick
and others a silver yardstick. Worse still the yard-
sticks are under manipulation all the time so that
the nations are not sure of their own yardsticks in
relation to each other. Although men live by trade,
the wisdom of the world hasn't yet tackled the
problem of putting on a stable basis the thing by
which trade is carried on. For three years, though
China has needed wheat and lumber, and we had
wheat and lumber, we haven't been able to solve the
problem of exchanging our mutual needs.

Recently, a man was elected as president of a
nation that had no gold and could not trade with
anyone or even pay its own debtors. He issued
three billions of gold-money to help get
things going, and he applied the money to a
lot of war debts in silver. This lowering of gold
and increasing of silver value, has helped to bring
China and Canada to a point where they can trade
with each other again.

Two years ago a big mill at a place with the
significant name of Dollys closed down. It had
been shipping its product entirely to China. A week
from today it is to reopen. The deflated or sound
money that people are told to apply to this big mill

government that the land was suitable for wheat.

It is a principle which would mean that the
government would not issue a license to plant
wheat until the farmer had been certified by the
government that the land was suitable for wheat.

Aimee Is Likely To Lose Temple

DAVID HUTTON PACKS UP AND QUITS ANGELUS

Leaves Bearings as Hears
Wife About to Be
Replaced

LOS ANGELES, June 9.—Angelus Temple, which has experienced many mysteries, had the air of any other one tonight.

David L. Hutton, baritone singer, who has long ago eloped to Yuma by airplane with Aimee Temple, Canadian-born evangelist, who is in the temple, was being replaced by Mrs. Rhea Crawford Spivako, former "Angel of Broadway," who has been preaching at the temple in her absence.

Hutton said: "So-h-h! The Chinese man is only packing some stuff for a trip."

Meanwhile, Mrs. Spivako, who is a state director of the federal government, denies that she is the replacement of Mrs. Hutton as pastor. Mrs. Hutton is said to be in the temple.

The great agricultural wealth of Canada in 1932 has been estimated by the Dominion Bureau of Statistics at \$5,000,000,000. The two provinces which have over the situation are Ontario and Saskatchewan.

STAR GAZING

IRENE DUNNE

Although Irene Dunne came from musical comedy to the screen, most of her roles have not called for singing. More recently her singing personality has been emphasized on the screen. "The Silver Cord" is her latest picture.

Novel Method of Oil Extraction Bared at Meeting

FIRE BY-LAW AMENDMENTS ARE FAVORED

By-Laws Committee Would
Revise Police Court
Proceedings

Amendments consisting of revisions and additions to the present fire by-law and also a new regulation providing that motorists guilty of minor traffic infractions under the city traffic by-law may pay their fines to the clerk of the court, thus obviating the necessity of appearing in police court, were recommended to city council for adoption at the regular meeting of the fire by-law committee in the Civic Block Thursday.

One of the more important amendments to the fire by-law is to do with cleaning and erecting establishments and representatives of this trade present at the meeting expressed themselves as being satisfied with the new regulations. The amendments of a small, common and relatively inexpensive permitting extracts to be done by each mill, at its own plant, thereby saving the expense of shipping concentrates to another.

The number of the metals contained in the ore and the difference in the frequency process, as these can be ascertained by assay.

Then, the speaker, pointed out, all that is necessary is to apply in sequence the appropriate process for extracting each metal.

The process consists of the use of an electric furnace in which the concentrated ore are placed. A flame from the electric arc is then imposed on the ore. Superimposed on this is the frequency of the metal to be extracted when that metal is a magnet.

The frequency of a metal is a known quantity. The United States delegates to the Congress and was today chosen, as secretary of the Radio section.

Metals May be Recovered Slightly by Use of Fre- quency Process

VANCOUVER, June 9.—An achievement of science that may revolutionize the mining industry, particularly in British Columbia and Ontario, where their complex ore problems, was detailed to the fifth Pacific Science Congress Thursday by C. A. Pettit, of Portland, Ore., in a paper on "recovery of metals from ores by use of a frequency process."

Mr. Pettit, a graduate of the University of London, spent eight years in Canada engaged in research work in Montreal.

Explaining the new process, Mr. Pettit said its significance lies in the fact that it is possible to extract from the ore, in a frequency process, a given concentrate with a high percentage of recovery, quite comparable with that of the flotation process.

STANDARD EQUIPMENT The equipment used is already standardized and the novel feature is the use of the electric furnace in combination with an oscillator or oscillator for the purpose specified.

The process consists of the use of an electric furnace in which the concentrated ore are placed. A flame from the electric arc is then imposed on the ore. Superimposed on this is the frequency of the metal to be extracted when that metal is a magnet.

Noted Spooner Oil Case Will Be Sent To Privy Council

Right of Government to Assess Royalty Tax Goes to High Court

CALGARY, June 9.—Right of the federal government to assess income tax on royalties received under the Canadian Patent Act will be taken to the Privy Council, it was announced last night by H. B. Patterson, K.C.

Mr. Patterson, acting for Mrs. Catherine Spooner, will leave here June 14 to present the case before the privy council in London. It revolves round sale of oil lands patented under similar circumstances as individuals and corporate bodies are liable to income tax, scores of millions of dollars have been assessed.

Mrs. Spooner, owner of freehold land in Turner Valley, has purchased from the Canadian Pacific Railway in 1902, first operated the property as a ranch and later sold parts of it to Volcan Oil, Ltd. for \$5,000 and 20,000 shares of Volcan stock and 10 per cent royalty.

The exchequer court of Canada ruled in September, 1930, the royalties were taxable and upheld the contention of the minister of national revenue. The supreme court of Canada in 1931 reversed the exchequer court's ruling, holding the royalty was a return of capital and not an income and therefore not liable to income tax. The appeal to the privy council was taken at the instance of the minister of national revenue.

Mr. McKee outlined to the meeting some of the workings and problems of his department. He stated that one of the problems was the great difficulty of defining independent cases as against unemployment.

Mr. McKee suggested that the department should recommend a definite plan for community action in finding employment and that action was taken, the matter being left for further consideration.

McKEE DISCUSSES RELIEF SYSTEM

Stating that the greatest difficulty in providing work for unemployed recipients of relief was to find work which did not involve a large capital expenditure, H. B. McKee, manager of the city relief department, urged that communities take on themselves the problem of finding work for the unemployed.

Mr. McKee spoke at a meeting of the Federation of Community League, called to consider a resolution of the Highlands League, urging that work be provided for unemployed in view of the alleged ill effect of direct relief on the morale of the unemployed, occupied the chair, which was taken over last night in the meeting by L. Lloyd Jones.

Mr. McKee also pointed out that work is provided to enable unemployed to defray relief indebtedness but that the department has been unable to find sufficient of such employment.

Mr. McKee outlined to the meeting some of the workings and problems of his department. He stated that one of the problems was the great difficulty of defining independent cases as against unemployment.

Tennis Enthusiasts Expect Most Successful City Tournament In History

ENTRIES WILL CLOSE JUNE 15 FOR NET MEET

It will be a long time before the Grad-Durant basketball series, concluded Wednesday with a straight-game triumph for the Oklahomans, is forgotten here. The series made history in more ways than one, though principally in the defeat of the Grads. But besides this there has been a series of games in this city that left behind on many recollections of one kind and another. On the streets and in the haunts, where sports fans gather, there was little else but discussion of the victory of the invaders. And criticism of a visiting official who would in fact be his charge as to assist in the coaching of the Durant team while the series was in progress. That last was something that particularly irked the fans. It is mighty difficult for a referee to be fair in his decision if he is taking an active part in coaching one of the teams fighting in the game.

While fans were disappointed in the outcome of the Olympic elimination play-off, there was no criticism of any sort had Referee Herman Smith, from Oklahoma, not forsaken his official position to the extent where he took a personal interest in reaching the team. The public is hard to please and a referee could be impartial in his decisions after that. And little wonder. . .

Details of Smith's part in the coaching of the team did not become widely known until yesterday, but it then became an established fact that he had been working with the team daily at the Arena. On Tuesday, J. Percy Page, Grad, monitor, received a call from an Arena official that Smith was at that very moment drilling the visiting team. In company with the secretary of the Alberta Basketball Association, Mr. Page went to the Arena to see if that was actually the case and, upon their arrival, Smith was putting the squad through their paces and brushing up on their play. The Grad coach pointed out that while he had no personal objection to his actions, it would be hard for him to justify them with the fans if he became known. . .

Neither Percy Page nor members of the Grads complained through they heard that Smith was actually on the team. But you can imagine what most other athletic organizations would have done. . .

Incidentally, Coach Bab, of the Oklahomans, team, after being demanded that the Underwood International Trophy be turned over to him, although the series was not being played for that of silverware, but for the title of North America's Olympic representative. Play for this trophy is governed by a strict constitution that requires a formal challenge and specified rules. No challenge was even mentioned by the Durant team when arrangements were being made to come here for the Olympic series and thus the Grads will retain the cup until one is entered.

The team holding the trophy is

Wins By Kayo

Rugged, ruthless puncher from the West, Max Baer of Livermore, California, last night established himself as one of the great heavy-weight men of present boxing by whipping Max Schmeling on a technical knockout in 10 rounds in their New York bout.

MAX BAER

Durant to Meet Calgary Friday

CALGARY, June 9.—The girls' basketball team from Durant, Okla., which defeated the Edmonton Grads three straight games for the right to represent North America in the women's Olympics at London next year, will play here Friday night.

The Durant girls will meet Calgary All-Stars in an exhibition game. Arrangements for the game were completed by S. F. Babbs, team manager, after arrival in Calgary from Edmonton Thursday night.

RANKING LIST

The city ranking list in men's and women's play have been issued as follows:

Men — Harry Kinloch, Lindsay Carver, Eugene Carrigan, J. Oliver, Fraser Goddard, F. J. Mitchell, E. M. Gundersen, J. A. Stott, Walter Mackintosh, Stan Mohr, Hastings McMahon, Allan Nash, Alfred Blyth, Reginald Crampton, F. C. Campbell, Thomas Bellamy, F. E. Brissette, Harry Gardner, James Hoyle.

YOUNG WESTERN ARRRIVER WINS OVER DER MAX

Rolling Butcher Boy Blasts Schmeling Into Crushing Knockout Defeat to Thrill Crowd of 65,000 Fans

BY GAYLE TALBOT Associated Press Sports Writer

NEW YORK, June 9.—A roasting young blade from out of the west with thunder in his brawny fists and all the "killer instinct" he has any use for, stood today a threatening menace to Jack Sharkey's unbeaten record.

RAVEN TUNTON FUMES

A minute and 51 seconds of the 10th round had ticked away when Referee Arthur Donovan stepped forward meaningfully to lift Baer's hand and spare the game German further punishment. Baer, ready to drop, his guard down and his eyes glazed, Schmeling was an easy target for a punch that must have done lasting injury. An angry, a disconcerting voice from the massed thousands in Yankee Stadium.

WOULD BE FAVORITE

Fighting as he did last night, at the same vicious pitch, the man from California would be a favorite to turn through Sharkey's guard and stretch him on the canvas, or to cut down the gigantic German with the fury of his attack. He apparently is immune to punishment, and his own right is like the kick of a mule.

NEVER SAW HIS EQUAL

It was the first time Schmeling had been knocked down since he came to United States five years ago. He had built up a legend of immunity to the worst punches. But he hadn't run into a right like the one Baer landed last night.

ORDERED BAR TO WAIT

So confident was Baer's manager, Ancel Hoffman, of the ultimate result that he sent his superbly conditioned young man into the battle with absolute orders not to open up until after the fifth round. That despite the odds were as high as four to one in Schmeling's favor at that time.

STILL FAVORED GERMAN

Especially at the ring-side settled back, confident that the Californian had shot his bolt, that the German would slowly, efficiently cut him to pieces the rest of the way. The crowd boomed the Livermore product heartily as he backed around listlessly, or stood in his corner and let Schmeling pour in blows.

Livestock	
things.	
The tape says that the advance has	not
not estimated and that tape has been	undoubtedly
undoubtedly the most accurate forecaster of price	movements in existence.

98c

—Boys' Wear, Main Floor

Summer Neckties

In a Companion Sale Offer—2 for 59c

Now! When hundreds of men are laying in a fresh supply of shirts—we've arranged a great sale of ties to complement them. High-grade ties, too, blue cut, wool lined, patterned and colored for summer. And at a price less than the change for the two dollar bill that bought you a shirt. For one week—49c

June 10th to 17th. SPECIAL

Sale of Broadcloth Shirts

EATON'S offers "Dromore" white broadcloth shirts in a great Summer Sale. Arranged for one week only and featuring collar-attached shirts tailored in imported English styling of close even weave. Six-button front style with bone stayed cuffs and single button cuffs. The season's outstanding value offer at this price.

\$1.49

SALE PRICE 2 for \$2.95

—Men's Shirts, Main Floor

"Scottie" Oxfords

Just what you're been asking for, in camp or sport outdoors. Two-tone leathers, as sketched.

Children's

\$1.29 \$1.49

Boys' Men's

\$1.98 \$2.19

—Shoes and Second Floor

Sal Men's Buttonless and Buttoned

Balbriggan Combinations

Knit From Fine White Cotton Yarns

Cool, absorbent, short legged, short sleeve or sleeveless under-vest. The favorite between-season garment of most men and worn by many the whole season through. Properly proportioned and finished with strongly worn seams. Sizes 34 to 46. A value that sets records.

59c

—Men's Underwear, Main Floor

Summer Caps

Men's 8-piece white and fawn drill caps that assure "cool" heads during the sultriest weather.

25c

SPECIAL

Teconit Tops, 29c

Closely knit white cotton athletic jerseys with low-cut armholes and open neck. A generous length, too, — all seams are over-cast. An EATON product at a Sale Special pricing. Sizes 34 to 46. Each 29c.

Broadcloth Shorts

Three-button band style shorts in a wide range of colored stripe effects. Full cut, properly proportioned for wear and comfort, and topped with an elastic-plated waistband. Sizes 28 to 44.

39c

A SALE SPECIAL

—Men's Underwear, Main Floor

Again these Dixie Paper Cups of Fruit Ice Cream as an all-day offering.

2 for 5c, OR EACH 3c

—Candy Circle, Main Floor

EVERYBODY'S CANDY TREAT

Mint Molasses Kisses, 19c lb.

The Eaton Candy Kitchen has sent in this week-end a shopping treat. Chewy pieces individually wrapped in waxed paper. Deliciously flavored with mint and molasses.

—Candy Circle, Main Floor

VALUABLE SAVINGS—VALUE EXTRAORDINARY

"Comrade" 6-ply Ties

Size 30x4.50 **\$2.45**

29x3.50 **\$3.65**

28x3.75 **\$3.65**

28x3.25 **\$10.50**

20x3.25 **\$10.50**

31x3.25 **\$11.50**

30x6.00 **\$12.85**

35x6.00 **\$13.50**

Best results and most reliable ties are at all times kept at the Eaton's store.

The damage done and the loss to the store is too great to allow due to under-valuation of ties. For better 12-point stress. Never let your ties go below 12-point stress. Another bit of good advice is the Comrade 6-ply Ties.

—Comrade Ties, Downtown

Dollar Day in Lingerie and Children's Wear Section

knit. DOLLAR DAY

—Lingerie and Children's Wear, Second Floor

Coats, Reg. \$25, \$29.50, \$35, Reduced to \$19.75

The exclusive higher priced coat "prizes" of the season — the models eminent designers planned as brides' "going away" coats, as distinguished travel coats, as the perfect completion of an afternoon or evening costume. There's a real note of excellence in fabrics and fur — imported woollens wear silver fox, red fox, brown squirrel, galyak kid and mole in lavish trimmings. Some all-occasion unfurred coats in the same superb materials, or in imports more sporty in air, are numbered in the group. Sizes 14 to 52½. SATURDAY, \$19.75.

—AVAILABLE ON DEFERRED PAYMENTS AT AN EQUITABLE EXTRA CHARGE.

Scores of Pastel Frocks

And Not One Too Many at This Popular Low Price!

Just in, fresh from their tissue wrappings—tailored with a slim young smartness; trim and neat in line. Amazing to find them at as low a price! Each has a distinguished touch of trimming—fagoting, piping, or a score of dainty contrasting colors. The calanese crepe is a rich quality, with a frosty dull finish—and in lovely pastels. Sizes 14 to 44.

\$2.69

SPECIAL

—Dresses, Second Floor

New White Skirts

Summer Woollens Smart and New

Several attractive styles—trig with box pleats, tucks, yokes, little lined pockets, or even a row of tiny pleats around the hem. Fabrics allow almost the same wonderful variety — diagonal and basket weaves, or novel textures. Sizes 14 to 30. SPECIAL

\$2.95

—Sportswear, Second Floor

Women's Sport Hats

Crisp Piques or Crepes "In the Rough"

The newer Summer Softies are in fabrics to match your sport frocks — the corded piques and the swanky rough crepes. Stitched brims and crowns with tucks or pert little bows. You'll want one in a pastel or a "sail" shade as well as the inevitable white. Do be early!
